faytech's Embedded Touch PCs have a pre-installed Android 6 operating system and are equipped with W-LAN module. The device has an IP65 water- and dust proof front panel with capacitive 10-finger multitouch. All the PCs have VESA 75 or VESA 100 screw patterns on the back, while the 13.3" to 27" come with their own desktop stand included.

The Embedded PCs are build for 24/7 operation and powered by the powerful V40 QuadCore mainboard, with 2G DDR3 RAM, 8GB flash memory, a SATA connector and SD card slot for further storage expansion.

This device has an optically bonded touch panel, which will improve the stability, reduce the reflection, increase the viewing angle, and enhance the perceived brightness. It also provides resistance to dust particles and shows a better image in general.

It is the perfect choice for a wide variety of applications, including industrial automation, control panels and digital signage.
